Steve – Andrew Schmidt came by and relayed the information about the water levels in the GW monitoring wells for OU-03. I agree that at this time, we should post-pone the sampling for VOCs and SVOCs until the June sampling and see what the water level readings will be then. So for March, PWT will sample the wells in OU-03 for metals.

For OU-02, I am following up on a number of items with regard to the City's plans for their storm sewer improvement project. One of the items I had on my list was to send you and Andrew a copy of the HH and Eco risk assessments for OU-02. I'm attaching the HH to this email but I'm not sending the folder with the risk calculations or the folder with the electronic data. If you need them let me know but I figured it might make the email too big to send.

I'll attach the Eco in a separate email.

Rest of the items from our discuss still to come.

Paula Schmittdiel
